

Interamerican Digital Traineeship Program (code DTP16)

Are you good at maths? Do you love statistics? Are you creative and curious?
Do you see opportunities and like problem solving?

If you possess these skills then you should consider a career as a Data Analyst in one of the largest Insurance companies.

Interamerican has the vision to become the 1st Digital Insurer in Greece by 2020.

The new **Interamerican Digital Traineeship** is a two year fast track learning program designed to develop analytics professionals who will get experienced in managing big data and help the company to make more informed business decisions.

As a trainee you will be given the opportunity to work in 3 different projects, each for 8 months, within 2 years. At the same time training and development programs will follow in order to gain significant knowledge of the insurance business and industry. After successful completion of this 24 months program you will be prepared to move into a professional position at Interamerican.
